PROFILE

I am Aymen, a passionate IT student at ISET Tozeur with a strong interest in programming, web development, and technology. Over the past few years, I have gained practical experience in various fields of IT, including coding, debugging, and project management. My skills are centered around building efficient, user-friendly web applications and solving complex problems through code. My  Experience: During my internship, I was responsible for developing web applications using HTML, CSS, JavaScript, angular, symfony and PHP. I collaborated with a team to create responsive designs and optimize website performance, ensuring seamless user experience. Additionally, I contributed to debugging and improving legacy code, which helped enhance the overall functionality of several web platforms.

EDUCATION

2023 – 2026
tozeur, Tunisie

Higher Institute of Technological Studies (ISET) Tozeur – Tunisia,
Bachelor's Degree in Computer Technology (Ongoing)

- Specialized in developing IT solutions, including web development, database management, and modern technologies like **Angular, React,** and **Node.js**.
- creating a full-stack web application using the **MERN stack**.

PROFESSIONAL AND ACADEMIC EXPERIENCES

Tozeur, Tunisie

Web Developer - Academic Internship
Itqan :

- Designed and developed a complete website using **Angular, MySQL,** and **SQL**.
- Built and integrated frontend and backend features to ensure a seamless user experience.
- Optimized database performance through efficient SQL queries.
- Collaborated with the team using **Agile** methodologies for iterative project delivery.

Open Source Contributor

freeCodeCamp :

- Participated in the development of open-source projects by resolving bugs and implementing new features.
- Worked with an international community of developers, submitting pull requests and reviewing code.
- Utilized **Git** for version control and collaborative workflows.

GitHub Project Creator

Personal Projects:

Solar System:

- Built a project with multiple branches (**main**, **dev**, **features**, etc.) to explore advanced web development concepts.
- Integrated **Firebase** for user authentication and data management.
- **MERN Web Application** (*Ongoing*):
- Designed and developed a full-stack web application.
- Implemented interactive frontend features with **React** and backend APIs with **Node.js** and **Express.js**.
- Leveraged **MongoDB** for efficient and secure data storage.
